

# RIAT.AC.AT PROGRAM APRIL 2019

**TUE, 2.4.2019, 11:20**

[RIAT ESSENTIALS: experiences from distributed research and innovation in decentral communities](#)

Matthias Tarasiewicz presents the upcoming research programme of RIAT and introduces RIAT ESSENTIALS.

**Location: ANON Blockchain Summit**

**TUE, 2.4.2019, 19:00**

[Ethereum Vienna Meetup \[TECH\] State of the DEXes](#)

We will look at Ethereum-based decentralised exchanges and how they function: Ox, Ethfinex and OasisDex. We will further look at KyberMarket, IDEX and others. Finally we discuss DEXes for NFTs.

**WED, 3.4.2019, 19:00**

[Capacity Distributed Storage - Kickoff Event](#)

In this Event, secure and redundant storage of critical files that are replicated across a distributed network are demoed and discussed.

**THU, 4.4. - SUN, 7.4.2019**

[RIAT Academy: Smart Contract Development with Ethereum](#)

This course teaches the basics of smart contract development on the Ethereum platform. It covers the full workflow of developing, testing and deploying contracts as well as interacting with them afterwards. In addition you will learn about common contract patterns and potential security issues.

**FRI, 5.4.2019, 18:00**

**RIAT ESSENTIALS PROGRAM  
LAUNCH EVENT**

Workshop series for the improvement of business models, evaluation and validation of research-driven projects . RSVP please!
